UNIVERSAL RECEIVER (RB709U-NB)

The Universal Antenna (RB709U-NB) Receiver gives you the ability to use one remote to activate your gate operator and your garage door opener.

Standard one-button transmitter for a GTO gate operator.

Two-button Transmitter with keychain. Controls one or two gate operator(s) or garage door opener(s).

STANDARD FEATURES

- Converts garage door openers to work with GTO Access System Remotes (radio controls).
- RF frequency 318 MHz.
- Connects easily to any brand of gate operator or garage door opener.
- Up to 100 ft. (30 m) range.
- Power supplied by access controller or optional transformer (RB570).
- Weather-resistant housing for outside or indoor mounting.

The normally open relay on the Universal Receiver can be connected to the push button terminals on most garage door openers.

The RB709U-NB also receives and decodes the special signals from GTO wireless access devices such as the wireless vehicle exit sensor (R4500).

Compatible Operator Models:

GP-SL100, GP-SW100, GP-SL050, GP-SW050, GTO/PRO Linear Actuator series. Branded Garage Door Openers: Chamberlain, Genie, Linear, Wayne Dalton, Martin, Amarr.
